Lead AI/ML Engineer building secure enterprise LLM, RAG, and agent platforms across AWS and Azure.

Experience

- Lead AI/ML Engineer** | General AtomicsJune 2024 - Present | San Diego, CA
- Avoided \$15M in annual spend by developing an in-house, DoD-compliant enterprise AI chatbot using AWS Bedrock, Azure AI Foundry, and LiteLLM.
 - Increased workflow efficiency 4x for 10,000+ users by developing a self-service RAG platform with Azure AI Search, AWS RDS PostgreSQL, and Python.
 - Achieved \$50M ROI from labor-efficiency gains by developing a self-service agent platform using MCP and centralized authentication and authorization integrations.
 - Reduced engineering technical-order development time by 40% with agentic search and generation using GraphRAG, Amazon OpenSearch, Amazon Neptune, and AWS Bedrock.
 - Reduced deployment time by 90% with Terraform, Terragrunt, and GitHub Actions CI/CD, making deployments consistent, repeatable, and auditable.
 - Reduced manual processing time by 90% across key business workflows by deploying autonomous multi-agent systems with Azure Durable Functions, Python, LangGraph, Semantic Kernel, and the Claude SDK.
 - Increased developer productivity by 30% by rolling out AI development tools and supporting integration into the software development lifecycle.

- Systems Administrator** | General AtomicsFebruary 2023 - June 2024 | San Diego, CA
- Automated software request and endpoint deployment processes using JFrog Artifactory.
 - Replaced a manual iOS build and signing process with GitLab CI/CD, cutting build and signing time from hours to minutes.

- IT Strategic Analyst** | Tillster, Inc.October 2021 - February 2023 | San Diego, CA
- Reduced onboarding and offboarding time by 90% and improved security through automated account provisioning across company applications.
 - Developed a centralized MuleSoft API management system to improve API discoverability, maintainability, security, and auditability.

- Compliance & Marketing Consultant** | Reynolds & ReynoldsApril 2018 - October 2021 | San Diego, CA
- Managed a territory of 100+ clients generating \$1M+ in annual sales while ensuring compliance with government and manufacturer regulations.

Skills

AI/ML: LLMs, RAG, agents, LangGraph, Semantic Kernel, MCP, GraphRAG, LiteLLM

Cloud and DevOps: AWS, Azure, Terraform, Terragrunt, Docker, CI/CD

Languages and frameworks: Python, JavaScript, TypeScript, Node.js, React, Bash

Credentials

Azure AI Engineer Associate | Microsoft

AWS Solutions Architect Associate | Amazon Web Services

Education

M.S. Computer Science | Georgia Tech | In progress, expected 2028

B.A. Psychology | UC Santa Barbara | 2017
